

Target Tracker Observations App Available Now

Target Tracker is the market-leading pupil assessment solution used in over 25% of English primary schools where the software has become an integral part of day-to-day teaching and learning.

With easy-to-use, seamless technology, the new Target Tracker Observations iOS app complements the existing software, enabling teachers to record observations in the classroom or on the go.

Features include:

- secure login and data upload
- recording observations with optional notes for individuals and groups of children
- photograph upload
- assigning observations to EYFS or national curriculum statements
